WHOLESALE LIST

Terms and Conditions of Sale

This List Cancels All Previous Quotations

TERMS:

All prices are f.o.b. San Gabriel, Calif. All accounts due on the first and payable the 10th of second month following purchase, to nurserymen with established credit. All supplies: Miracle Garden Ties, etc. are 30 days net. Otherwise, C.O.D. 1% per month service charge on overdue accounts. 2% discount for cash on delivery, or cash on picked-up orders. 5% discount for those who pay with advance order or by Nov. 1st. No discounts other than listed above.

PACKING:

Free on truck and carload shipments.
Baling at cost (app. 5% of order) on small shipments if by common carrier.

DELIVERY COSTS:

California—free delivery to most areas.
Interstate Deliveries—we deliver to other states at a low delivery price, by semi trailer. Contact us for actual cost.

CLAIMS:

For any cause, claims must be made within ten days of receipt of stock.

GUARANTEE:

We accept all orders subject to crop conditions, and we reserve the right to cancel a portion of the stock, or all thereof, should injury befall our stock from hail, windstorm, frost, other weather conditions, error in count, insect and disease injury, or other natural causes beyond our control. We are careful to keep our varieties true to name and will replace any portion of the stock that may prove otherwise, or refund the price paid for such portions. It is agreed that the original price shall be the maximum damages the purchaser is entitled to.

QUANTITIES:

Prices based on 10 trees per bundle. 100 of one variety takes 100 rate. 10¢ per tree charged for splitting to 5 on smaller grades.

OUR LOCATION:

Office, warehouse and yard—5 blocks east of corner of San Gabriel Blvd. and Las Tunas Blvd., 200 feet north of Las Tunas on Vista St., San Gabriel.
Fields at Visalia, Tulare County.
Deliveries from San Gabriel or Visalia during shipping season.
See back of Catalog for maps.

INDEX

Page 1. Introduction. The purpose of this book is to provide a comprehensive overview of the current state of research in the field of artificial intelligence. It covers the history, current trends, and future prospects of the field.

Page 2. History of Artificial Intelligence. This section traces the roots of AI back to the early 20th century, highlighting key milestones and the evolution of the field.

Page 3. Current Trends in AI. This section discusses the latest developments in AI, including machine learning, deep learning, and natural language processing.

Page 4. Future Prospects of AI. This section explores the potential applications of AI in various industries and the challenges that must be overcome to realize its full potential.

Page 5. Conclusion. This section summarizes the key findings of the book and offers a final perspective on the future of artificial intelligence.

OUR SERVICES

OUR IMPROVED AND MODERN METHODS OF PROCESSING DECIDUOUS STOCK ARE DESIGNED TO HELP YOU MAKE A PROFIT. ONLY BY YOUR SATISFACTION CAN WE HOPE TO CONTINUE TO GROW.

THESE SERVICES ARE DONE FOR YOU FROM THE FIRST STAGES OF GROWING, ON THROUGH EACH STEP OF PROCESSING, TO ENABLE YOU TO SAY TO YOUR CUSTOMERS, "I KNOW THESE TREES ARE GROWN, HANDLED AND PROCESSED RIGHT".

QUALITY! ALL TREES THAT REQUIRE STAKING ARE TIED WITH "MIRACLE GARDEN TIE", (PLASTIC). THIS ASSURES THAT YOU WILL NEVER RECEIVE TREES THAT HAVE BEEN CUT OR GIRDLED FROM THE USE OF TWINE OR WIRE TIES.

CARE! DAILY, DURING DELIVERY SEASON, OUR HEELING-IN GROUNDS ARE COMPLETELY SPRINKLED WITH OVERHEAD RAINBIRD SPRINKLERS TO MAINTAIN PROPER MOISTURE AND HUMIDITY. THIS IS IMPORTANT TO PREVENT DEHYDRATION OF UPPER BRANCHES OF TREES.

MORE CARE! ALSO, OUR HEELING-IN GROUNDS ARE EQUIPPED WITH HIGH PRESSURE HOSES TO ADEQUATELY SOAK-IN STORED TREES. THIS ELIMINATES AIR POCKETS AROUND ROOTS. THIS IS VERY IMPORTANT TO THE LATER GROWTH OF TREES. TREES MUST BE HANDLED RIGHT IN ORDER TO GROW RIGHT!

LIQUID PLASTIC DIPPING! ALL VARIETIES OF TREES THAT DEHYDRATE EASILY ARE DIPPED IN RUTEX W 3. THIS DIPPING HAS BEEN A GREAT HELP TO US, AND TO OUR CUSTOMERS, IN MINIMIZING THE LOSSES ON BAREROOT STOCK IN HANDLING AND STORING IN NURSERIES. RUTEX W 3 IS A LIQUID PLASTIC THAT DRIES ON THE TREE TRUNK AND LIMBS. IT IS INVISIBLE, AND HAS PROVEN A TERRIFIC DETERPANT TO DRYING OUT.

NO ABUSE! WE USE LAVISH QUANTITIES OF SHINGLETOW ON ALL DECIDUOUS DELIVERIES. THIS PREVENTS DRYING OF THE ROOTS IN TRANSIT, WHICH IS A POTENTIAL SOURCE OF TROUBLE TO DECIDUOUS STOCK.

SALES AIDS! OUR SALES AIDS HELP YOU SELL TREES.

- A. COLORFUL PLASTIC POSTER.
- B. HANDBOOK OF FRUIT TREE DESCRIPTIONS, FITS YOUR POCKET.
- C. INDIVIDUAL SHADE AND FLOWERING TREE COLOR PICTURE LABELS.
- D. INDIVIDUAL FRUIT TREE DESCRIPTIVE LABELS.

WE ARE EQUIPPED TO GIVE YOU REAL SERVICE, AND WILL ENDEAVOR TO HANDLE YOUR BUSINESS IN A PROPER AND EFFICIENT MANNER.

THESE EXTRAS FOR YOU

Extra Visalia Tree Field Quality

Shade tree seedling beds. Our own production, from seeds to finished trees.

Albizzia (Mimosa) and Texas Umbrella, one year trees. To be finished up as full, straight trees. To be dipped in "Liquid Plastic". Real quality, terrific protection.

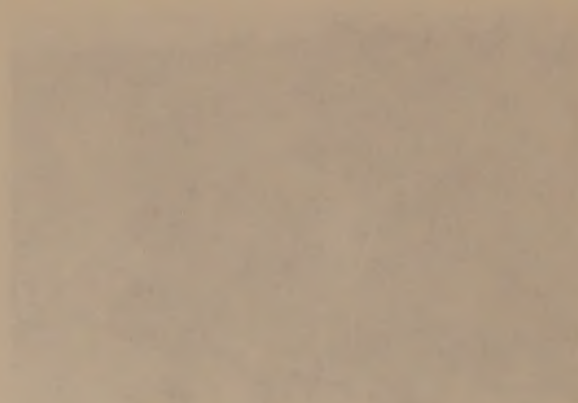

New modern equipment, wider rows, proper staking, tying and trimming. Shown are Babylonica Weeping Willow in late spring.

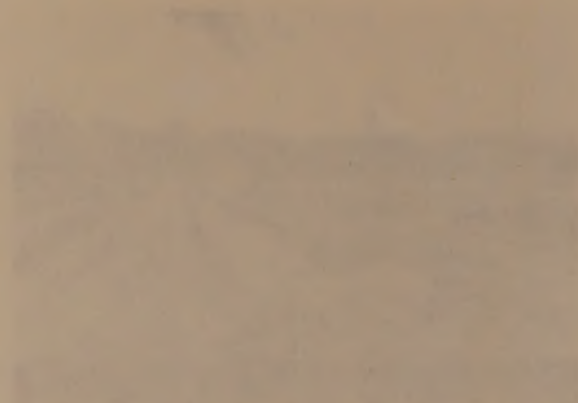

With this meticulous care we grow Willows like this. Shown are Babylonica Weeping Willows in late summer, due for one more trimming to form full, compact heads.

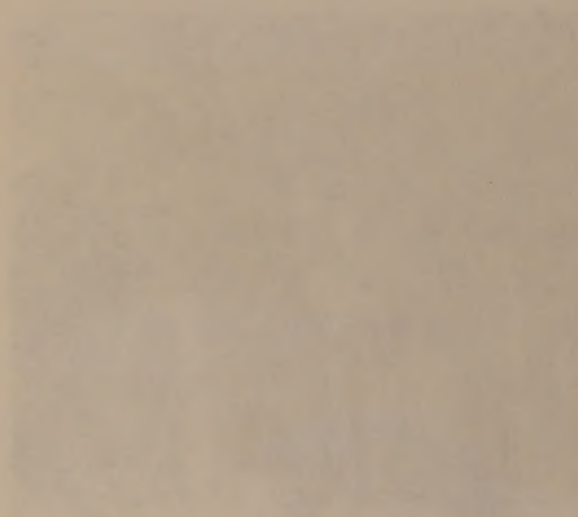

Visalia Tree Field

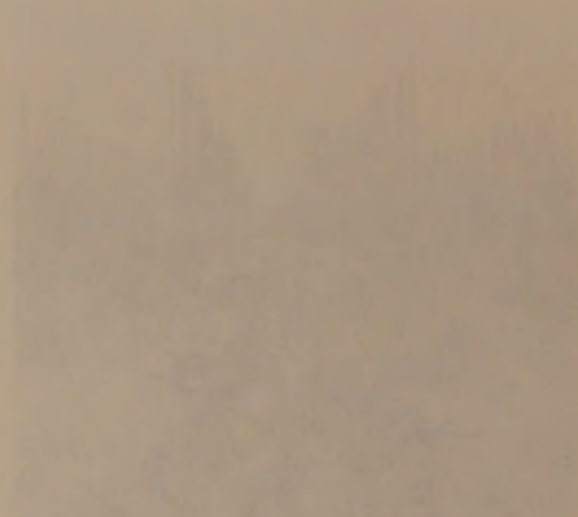

Visalia, California, and Fresno, California, are the two main cities in the Central Valley of California. The Central Valley is a large, flat area in the center of the state, and it is one of the most fertile areas in the country. It is home to many of the state's major cities, including Visalia, Fresno, and Hanford. The Central Valley is also one of the most important agricultural regions in the United States, and it produces a wide variety of crops, including grapes, almonds, and apples.

(Individual Descriptive Labels Furnished)

FRUIT TREES

THE CARMELO STORY

The Carmelo was developed and introduced by Sierra Gold Nurseries of Yuba City as the result of a planned program to breed new and better walnut varieties.

Starting with over 300 experimental crosses, records were kept in co-operation with the Yuba City plant of Diamond Walnut Growers, Inc., covering parentage, blooming and harvest dates, production, percentage of meat, quality of meat and shell, size and resistance to plant diseases. Over a period of ten years these varieties were narrowed down to a mere handful of which the Carmelo proved to be the most outstanding for home orchard use.

A "CONVERSATION TREE"

Carmelo is big, so big that people talk about it. The nuts are about twice the size of an average walnut, with some specimens as large as small peaches. Meats are large and white, of superb quality. In size and shape, Carmelo resembles the Bijou, while its early and prolific bearing suggest the Payne. It leafs out in mid-spring, harvests in September. It is grown commercially,

but has been most favored for home planting because of its vigorous growth and the spectacular size of the nut. It is not recommended for small city lots, but is a superb specimen tree for large lots and suburban areas. Carmelo should bear the third year.

PLANTING DETAILS

Carmelo should be planted, like any bare-root trees, before leaf buds open in the spring. Dig the hole approximately 3 feet wide, 2 to 3 feet deep. Plant the tree at same ground level as it was in the nursery, allowing two or three inches for the tree to settle. Irrigate immediately after planting if the ground is at all dry. After the tree is in the ground, cut the top back 15" above the graft union and seal the top cut with tree wax. To prevent sunburn, whitewash the trunk, or wrap with paper or tree wrap. After all buds have grown several inches, select the strongest and train it up along a stake. All other side limbs should be kept cut off.

- ★ GROWS TO 60 FEET
- ★ 40 to 60 FOOT SPREAD
- ★ HARDY, FAST-GROWING
- ★ GOOD SHADE
- ★ BIG, BIG WALNUTS WITH BEAUTIFUL WHITE MEAT
